## **21<sup>st</sup> Century Learning & Technology**

**Education, Communication, Technology**

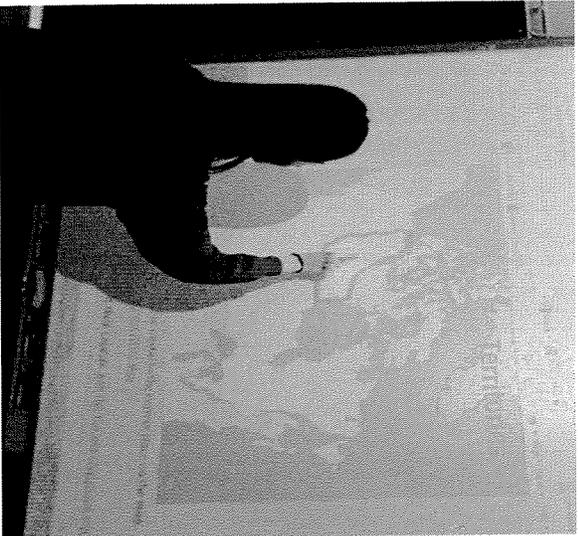

**21st Century Learning at  
Lo-Ellen Park Secondary School**

## It just makes sense.

Students are connected to our network with their own devices, allowing interaction with the teacher, other students and the Internet. Activities include Internet research, interactive web resources and simulations, developing presentations, and multimedia projects.

### SOFTWARE

Students in this program will be required to have word processing, presentation and data management capabilities. Google Apps for Education is available to all students free of charge. If purchasing Microsoft Office Suite the Student Version is recommended, but not needed.

### STUDENTS

Within our program students will develop skills transferable to the work force and to the post-secondary level. Students can communicate with their teacher via email and can let teachers know if they are experiencing difficulty. They can also remain connected to the classroom in the event of an absence.

## Flexible solutions for your education needs

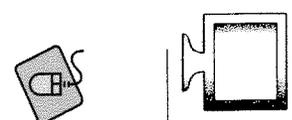

### TEACHERS

Lo-Ellen Park Secondary School teachers work hard to continuously improve the educational experience in this program. Teachers take the time to create content that suits the needs of our students and deliver curriculum in an engaging way. The results are impressive; students often produce multimedia works worthy of high praise.

Every year new

equipment is added to classrooms to create a 21C learning environment. Classrooms are equipped with SmartBoards and technology such as Chromebooks and iPads. Our network allows students to connect wirelessly anywhere in the school.

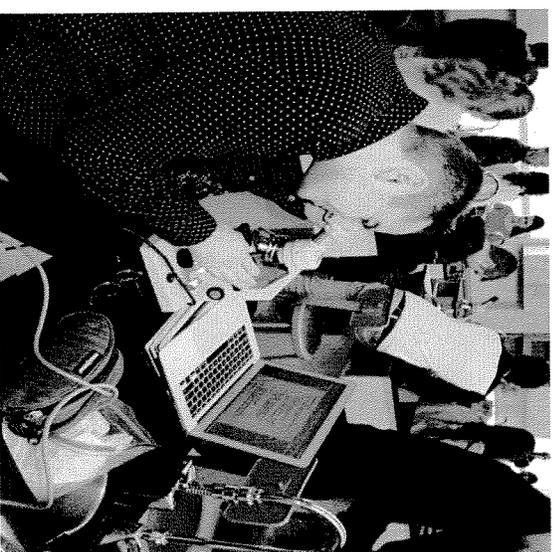

### MINIMUM HARDWARE REQUIREMENTS

Intel Core 2 Processor  
2 GB RAM  
60 GB Storage Space  
Wireless Internet  
Ethernet Cable  
Headphones with a microphone  
USB Memory Stick  
PC or Mac is acceptable

Typical systems cost between  
\$400 and \$1400

When purchasing a system, many businesses offer complete service options. It is important to note that students are accountable for their personal devices. They must assume responsibility for broken equipment.

Lo-Ellen Park Secondary School is committed to developing digital citizenship skills in all of our students.
